Summary

Passionate and driven Computer Science student with hands-on experience in full-stack web development and a strong foundation in competitive programming and problem-solving. Proficient in building scalable web applications using technologies like React, Node.js, Express, and MongoDB. Regularly solve algorithmic challenges on platforms like LeetCode and Codeforces, demonstrating strong analytical and coding skills. Eager to apply technical expertise and logical thinking in real-world software development roles.

Education

VIT BHOPAL UNIVERSITY

Sept 2023 – Sept 2027

BTECH in Computer Science and Engineering

- **CGPA: 8.47**
- **Coursework:** Data Structures and Algorithms, Database Management System, Operating Systems, Object Oriented Programming.

Experience

Core Member, Corporate Outreach Team

Bhopal

Entrepreneurship cell

Nov 2024-Present

- Engaged with potential speakers and sponsors to support various E-Cell events and initiatives.
- Developed targeted communication strategies to introduce event agendas and sponsorship proposals to industry professionals.
- Ensured a strong presence of experienced speakers and reputable sponsors at events, enhancing both the learning and networking opportunities for participants.

Projects

TECH-COMPASS

- **TECK STACK:** HTML5, CSS3, JavaScript, Bootstrap, Python, Django, Git, GitHub, Visual Studio Code, PyCharm.
- Designed and developed a web platform offering clear, structured roadmaps across multiple technology domains to guide learners at every stage.
- Curated and organized high-quality learning resources mapped to each step of the roadmap, ensuring learners have relevant materials for continuous progress.
- Implemented a gamified badge system to incentivize user engagement and recognize achievements upon roadmap completion.
- Built an intuitive, user-friendly interface to enhance accessibility, streamline navigation, and maximize learner engagement.

FISHKAT

- **TECH STACK:** React.js, Node.js, Express.js, MongoDB, Python, scikit-learn, HTML, CSS, JavaScript, Git, GitHub, Docker, REST API
- Developed a machine learning system to accurately classify URLs as phishing or legitimate, leveraging analysis of URL structure, HTML content, JavaScript, and WHOIS data.
- Designed and implemented an intuitive user interface to ensure ease of interaction and accessibility for users of all technical backgrounds.
- Integrated a suite of cybersecurity tools including a URL unshortener, image metadata remover, password generator, Base64 encoder/decoder, and hash generator to provide comprehensive online protection.
- Enhanced platform security and user trust by offering a robust toolkit to help users detect and defend against phishing attacks and related cybersecurity threats.

Technologies

Languages: C++, Python, Java, SQL, JavaScript

Technologies/Frameworks: ReactJs, Github, Git, NodeJs, ExpressJs, MongoDB
