Education

VIT Bhopal University

B.Tech in Computer Science and Engineering

Sept 2023 – Sept 2027

CGPA: 8.79 / 10

Technical Skills

Languages: C++, Python, Java, JavaScript, TypeScript, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend & Databases: Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT Authentication

Tools & Platforms: Git, GitHub, Docker (basics), Postman, Cloudinary, Razorpay, Vite

AI / APIs: OpenAI API, Gemini API, LLM Integration

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, System Design (basics)

Projects

Social Scheduler — AI-Powered Social Media Automation Platform [GitHub](#)

React, Node.js, Express.js, MongoDB, OpenAI API, Gemini API | Deployed on Render & Vercel

- Built a production-ready full-stack MERN social media automation platform with secure JWT authentication, Cloudinary media management, and responsive React dashboards, reducing manual posting effort by ~70% for end users.
- Integrated OpenAI and Gemini LLM APIs with prompt engineering techniques to auto-generate captions, hashtags, and post ideas, cutting average content creation time from 15 minutes to under 2 minutes per post.
- Engineered a calendar-based post scheduling system with full CRUD workflows using agile development practices, enabling users to manage 30+ scheduled posts simultaneously.
- Designed and implemented 12+ scalable RESTful API endpoints using Express.js and MongoDB for AI content generation, media upload, and scheduling workflows, achieving sub-200ms average response time; validated endpoints with Postman API testing.

Healio — Full-Stack Healthcare Appointment Platform [Live Demo](#) — [GitHub](#)

React, Vite, Node.js, Express.js, MongoDB, Razorpay, Cloudinary | Deployed on Render & Vercel

- Developed a production-ready MERN healthcare platform with role-based access control (RBAC) for 3 user roles (patients, doctors, and administrators) using JWT + bcrypt authentication. The platform served 100+ test users post-deployment.
- Built responsive React interfaces with Tailwind CSS and implemented real-time appointment slot management with server-side validation, eliminating double-booking conflicts and improving scheduling reliability.
- Designed 15+ RESTful API endpoints using Express.js and Mongoose with middleware-based authorization and clean separation of concerns; performed comprehensive API testing with Postman to ensure endpoint reliability.
- Integrated Cloudinary for optimized image storage and Razorpay payment gateway for secure online transactions, supporting an end-to-end appointment booking and payment flow with version control managed via Git and GitHub.

Experience

Core Member, Corporate Outreach Team

Nov 2024 – June 2025

Entrepreneurship Cell, VIT Bhopal

- Coordinated with 10+ industry professionals and sponsors, securing 5+ external collaborations and driving a 30% increase in event attendance across 4+ networking sessions.
- Led outreach and sponsorship communications for flagship events, enhancing learning opportunities for 200+ student participants.

Coursework

- **Data Structures & Algorithms** — Solved 500+ problems across LeetCode, Codeforces, and GeeksforGeeks spanning Arrays, Trees, Graphs, DP, and Backtracking (Easy / Medium / Hard)
- **Full-Stack Web Development (MERN)** — Self-taught via project-based learning, built and deployed 2+ production-grade applications using React, Node.js, Express.js, and MongoDB
- **Core CS Coursework** — Database Management Systems, Operating Systems, Computer Networks, OOP (VIT Bhopal University)
